

Your Perfect Fit for
Chameleon® as you
receive it

When you take it out of the bag,
you will find a knot in one end.

Untie the
knot.

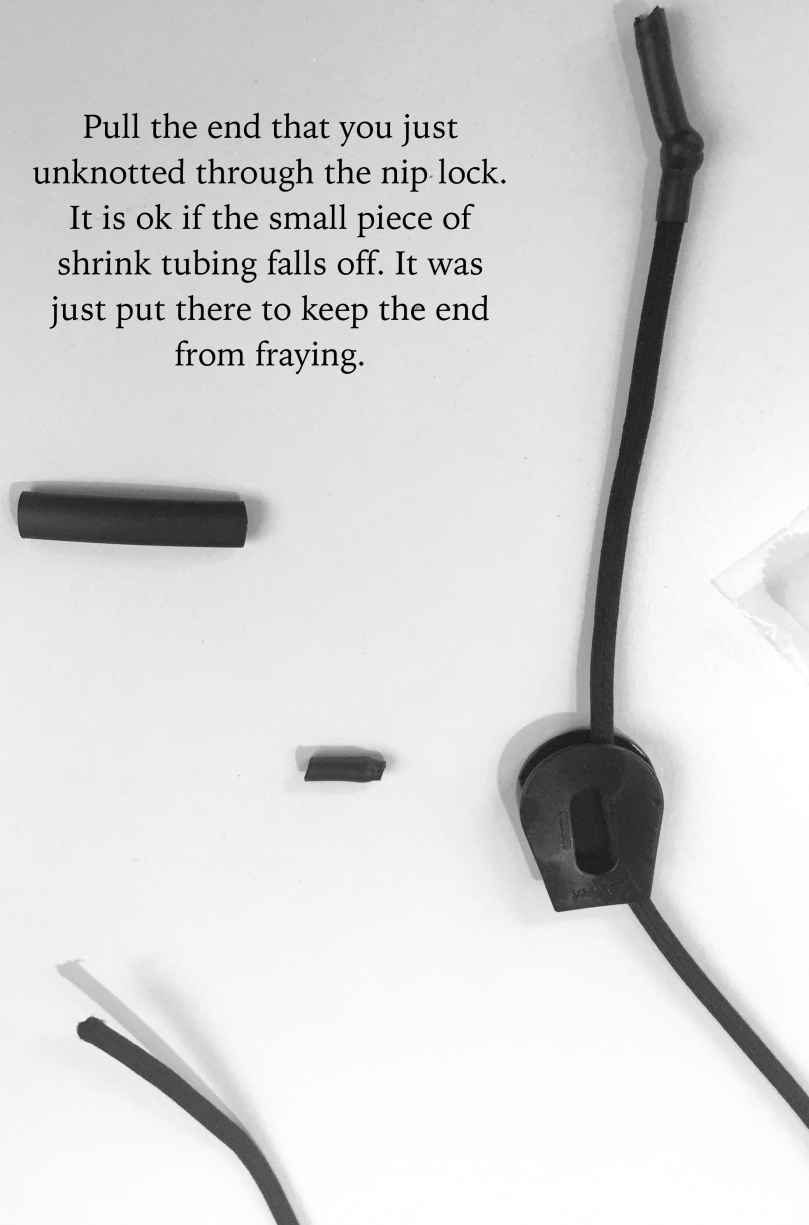

Your New Chameleon®

*Is your original Perfect Fit Collar losing its elasticity? Or, did your dog chew
it up?*

Slide the piece of shrink tubing off the end that you just unknotted.

Pull the end that you just unknotted through the nip lock. It is ok if the small piece of shrink tubing falls off. It was just put there to keep the end from fraying.

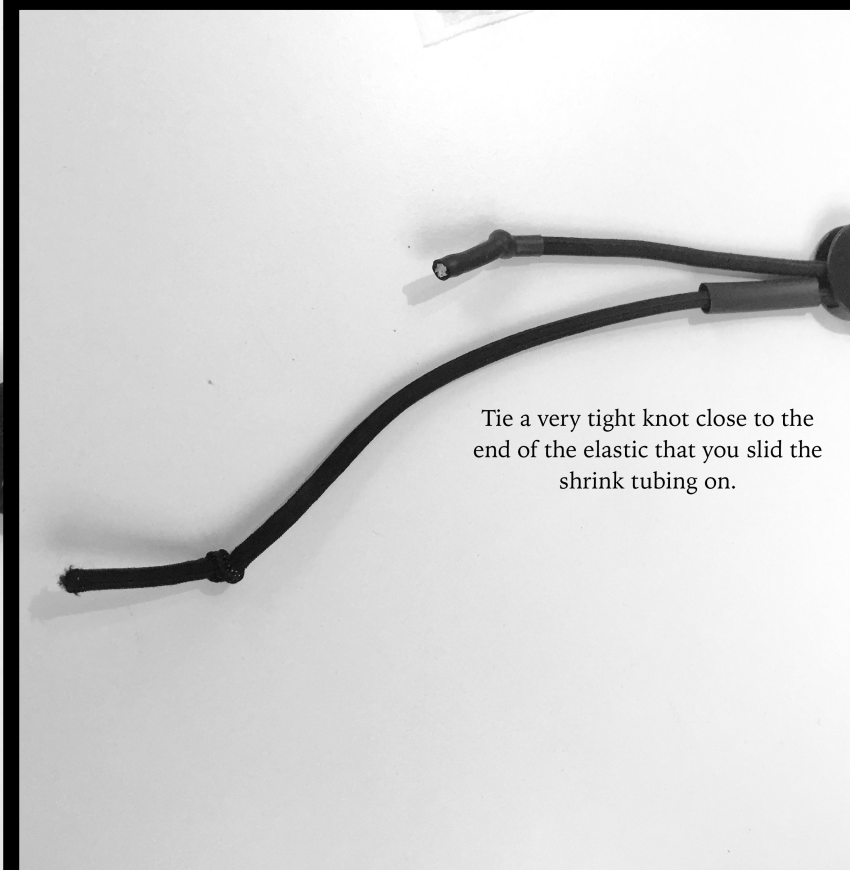

Thread the two ends on the elastic.

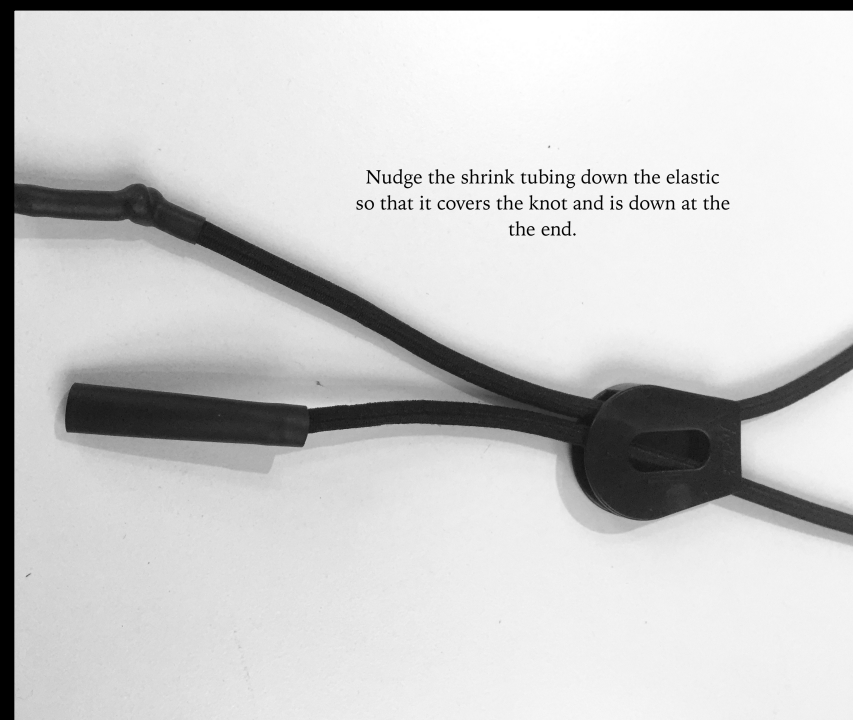

Put on a new one. It is simple.

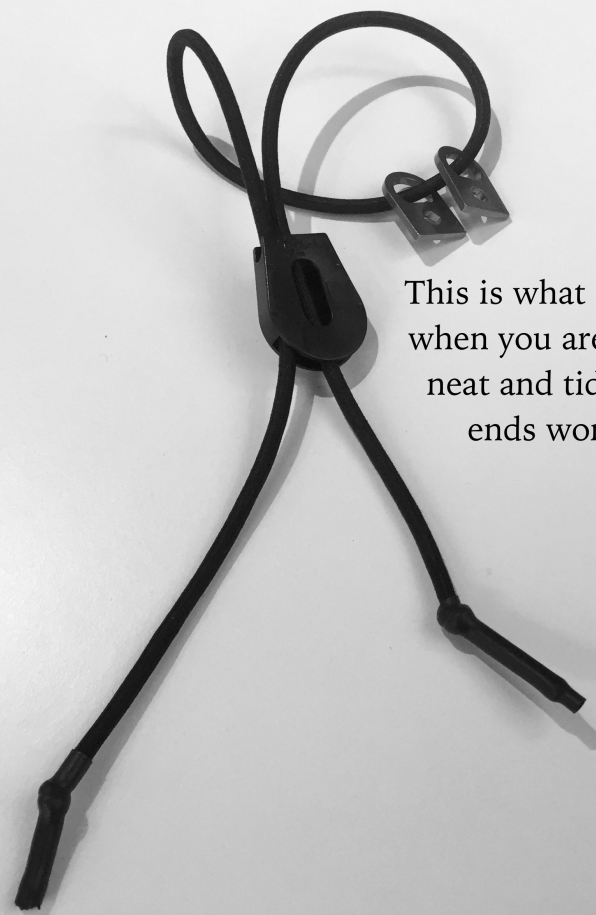

Follow these step by step instructions with pictures.

Everything is included.

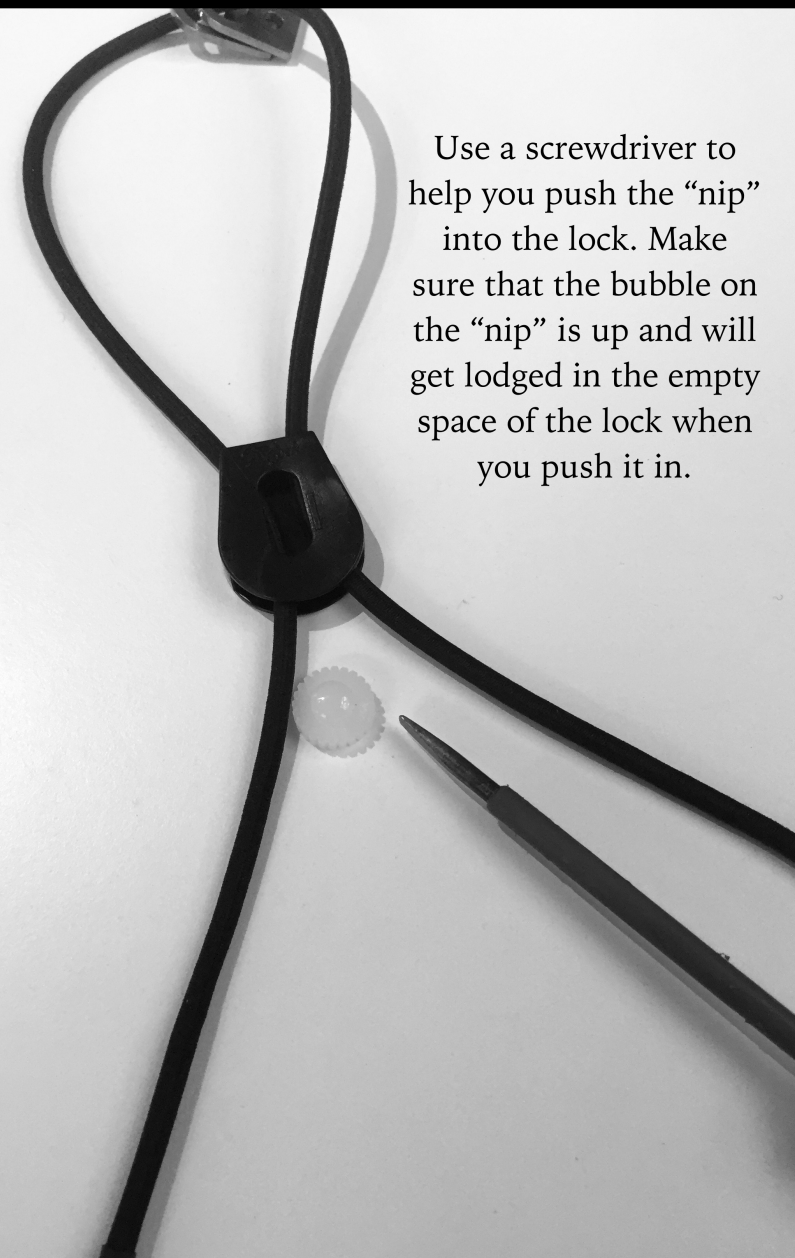

You just need a hairdryer or something with hot air...

This is what it looks like when you are done. It is neat and tidy, and the ends won't fray.

Take your "nip" out of the bag.

Use a screwdriver to help you push the "nip" into the lock. Make sure that the bubble on the "nip" is up and will get lodged in the empty space of the lock when you push it in.

And a pen or screwdriver.

Now your new Perfect Fit Collar is ready to use!

Easy!

It is done! It is brand new!
